PROJECT :1

Title :

MOBILE APP DEVELOPMENT(MOTOHUB APP)

Description :

- I got training in Flutter Technology to develop MotoHUB application.
- It is Social Media application like Facebook and Instagram only for client.
- This application is particularly made for Car racers, Promoter and for Track owners in news land.
- End Users can Upload Photos and Videos in this application, and we can follow and unfollow another user of this app.
- Users can comment and put like on the photos and videos uploaded by others.
- And Users have rights to remove their post from this app.
- Event Management and Payment gate ways are upcoming features of this application.
- MotoHUB app will support in Android, IOS and Admin Dashboard (Web).

PROJECT :2

Title :

GROCERY STORE MANAGEMENT SYSTEM

Description :

- Proficient in crafting straightforward grocery store management systems with Java and Spring Boot, centered around product and category management.
- Skilled in simplifying admin tasks and facilitating inventory tracking.
- Dedicated to enhancing operational efficiency and organization in grocery retail through intuitive software solutions."
- Inventory Management: Efficiently manage product stock, updates, and low-stock notifications.
- Point of Sale (POS): Streamline customer transactions with a user-friendly POS system.
- Customer Management: Store and analyze customer information for personalized marketing.
- Reporting: Generate sales reports and insights to optimize store performance.
