WORK EXPERIENCE

January 2022 – Present

Senior Power Platform Functional Consultant, Codec, Dublin (Contract)

Lead functional consultant for a large tourism client.

Senior Dynamics developer for a Public Sector Company.

Providing a customised Microsoft Power Platform CRM solution, incorporating Model-Driven apps, Canvas apps and Power Apps Portals, Power BI reporting and extending functionality with custom code.

Customising Power Apps Portals for external users using OOB functionality and JavaScript.

Customising a Model-Driven apps using Power Automate, BPFs, Workflows, Dashboards, embedded Canvas apps and JavaScript.

Delivering effective reporting functionality using Power BI.

Liaising with users to scope projects, gather requirements, estimate required effort, present plans and progress, deliver training and be the client's main point of contact.

Using Dev Ops to organise user stories, testing, present project progress and track feedback from clients.

August 2021 – January 2022

Power Platform Functional Consultant, Bearing Point, Dublin (Contract)

Customising a Microsoft Dynamics solution for a client.

Using Agile methodologies to manage projects by gathering user stories and requirements and organising regular client meetings to present progress and receive feedback.

November 2019 – August 2021

Power Platform Solution Analyst & Developer, Fidelity Factory, Calgary, Alberta, Canada

Working with a diverse list of clients to provide design and development solutions for individual business needs.

Designing and developing Power Apps, Power Automate Flows, Power Virtual Agents and Power Automate Desktop to create effective and efficient solutions. Example of solutions I have created: <https://youtu.be/pkdZC7xSL5A>

Highly proficient in SharePoint, the Microsoft Dataverse and SQL.

Presenting multiple App in A Day lectures.

Creating tutorial videos and educational content for Fidelity Factory's YouTube account to help increase our online presence in the industry. Example: <https://youtu.be/vC22fUICGRw>
