Projects:

Project 1 - Hungary (Implementation and Support)

Retail Industry (Grocery & Clothing) - Grocery & Clothing multi brand with 330+ Stores. The Company has finalized on the implementation of GOLD Retail as an automation solution for their retail, specific business processes. GOLD Retail application integrated with their existing ERP application (GOLD).

Implemented the GOLD with SAP Integration (Sales / Inventory Transaction of Retail Store). The challenging Part of the Project is SAP Integration and Retail Price/Schemes. Single Product will have multiple Schemes, the cashier will decide the scheme to apply based on the Customer requirement. The Sales Trade agreement will have different level of Price with different Unit of Measurement.

We implemented Employee Discount, Special Discount based on the Mail Approvals, Customer Accounts Payments, and Product Complaints, Supply chain / Master Planning.
