AANISHA BANU K

Senior Functional Consultant

PROFILE

Senior Functional Consultant with 3 years hands-on expertise in Microsoft Dynamics 365 Business Central, specializing in Supply Chain, Warehouse, and Financial Management modules. Proficient in gathering business requirements, translating them into technical solutions, and managing full-cycle implementations. Capable of understanding and debugging AL language code, contributing to minor development tasks and suggesting improvements. Demonstrates strong communication skills, stakeholder engagement, and post-go-live support. Certified in D365 Business Central with a solid foundation in Agile methodologies, Docker environments, and data migration processes.

HSC (2019)	Our Lady of Lourdes Matric Hr Sec School	88.5%
SSLC (2017)	Our Lady of Lourdes Matric Hr Sec School	94.4%

EXPERIENCE

Senior Functional Consultant

Preludesys | August 2022 – Present

- ✧ Expertise in D365 Business Central functional modules: Supply Chain, Warehouse Management, Financial Management, Admin Center.
- ✧ Experience with add-ons: Warehouse Insight, Dynamics Ship, Power Pick Global, Field Service.
- ✧ End-to-end implementation: Requirement gathering, Solution design, Environment setup, Testing, Training, and Post-Go-Live support.
- ✧ Practical knowledge in Docker: Setup, container management, and application deployment.
- ✧ Proficient in understanding and debugging Business Central AL code at a beginner level; capable of providing suggestions and handling small-scale development tasks.

PROJECTS

**TMHNA (Toyota Material Handling, North America) – Dealer Management System
(Oct 2022 – Present)**

Roles & Responsibilities:

- ✧ Lead the development team and oversee delivery of all development-related tasks within the D365 Business Central system.
- ✧ Collaborate with Product Owners and Subject Matter Experts (SMEs) to gather, analyze, and document business requirements across departments.
- ✧ Translate business needs into solution design documents and ensure accurate technical implementation.
- ✧ Coordinate with technical teams to integrate D365 Business Central with third-party applications, legacy systems, and custom add-ons.
- ✧ Create and execute detailed test plans, conduct functional testing, and resolve discrepancies or issues during the QA phase.
- ✧ Conduct User Acceptance Testing (UAT) alongside business users to validate system functionality and performance.
- ✧ Provide comprehensive post-implementation support, troubleshoot system issues, and recommend optimizations to enhance performance.
- ✧ Conduct demos to the Product Team on system capabilities and updates.
- ✧ Manage incident triage, coordinate with development teams for resolution, and ensure timely support during post-go-live phases.
- ✧ Planned and delivered trainings for freshers, covering the basics of Microsoft Dynamics 365 Business Central, key modules, and company processes.
