CAREER OBJECTIVE

Detail-oriented MIS Executive with extensive experience in Excel-based reporting, performance analysis, and stakeholder coordination. Recently trained in Oracle SQL and PL/SQL to strengthen my data handling and reporting capabilities. Now seeking a **Data Analyst or Reporting Analyst** role where I can apply my technical and operational experience to deliver meaningful insights, support data-driven business decisions and to solve real-world data challenges.

SKILL SET:

EXCEL & SQL/PLSQL

- Advanced Excel Functions such as Lookup, Match, Index, Offset, Indirect, Choose, Text and Date Formulas.
- Hyper Links, Freezing Panes, Advanced Filtering.
- Pivot tables, Pivot charts and slicers.
- All the arithmetical (Sumifs, Averageifs, Countifs), Logical formulas (And, Or, IF) and text functions, dated formulas.
- Strong knowledge of SELECT queries, filtering (WHERE, BETWEEN, IN, LIKE) and sorting (ORDER BY) for real-time data extraction
- Proficient in writing and optimizing JOIN operations (INNER, LEFT, RIGHT, FULL) to combine data from multiple tables
- Experienced in Subqueries (single-row, multi-row, correlated) and Set Operators (UNION, INTERSECT, MINUS) for complex data retrieval
- Worked with Group Functions and GROUP BY/HAVING clauses for aggregated reports
- Familiar with Analytical Functions such as RANK(), DENSE_RANK(), ROWNUM, ROW_NUMBER() for data analysis
- Hands-on with SQL Loader and External Tables for efficient data import/export
- Worked on Views, Materialized Views, Indexes, Table Partitioning, and Virtual Columns for performance optimization
- Comfortable using SQL*Plus, Hints for query tuning, and Pseudo Columns like ROWNUM, SYSDATE, LEVEL
- Developed Anonymous Blocks and Nested Blocks using %TYPE, %ROWTYPE for modular coding
- Applied Control Structures like IF, CASE, LOOP, WHILE, FOR in business logic implementation
- Developed and tested Stored Procedures with IN, OUT, IN OUT parameters for encapsulating business logic
- Created user-defined Functions for single-value return operations to simplify reporting logic
- Built Packages (Specification and Body) for grouping procedures/functions into modular components
- Used Cursors and Ref Cursors for record-by-record processing and dynamic queries
- Applied BULK COLLECT, FORALL with SAVE EXCEPTIONS for high-volume data processing
- Utilized EXECUTE IMMEDIATE for dynamic SQL and Bind Variables for performance and security
- Implemented Triggers (LOGON, LOGOFF, Compound) for automation and PRAGMA AUTONOMOUS_TRANSACTION for independent audit logging
- Used UTL_FILE for file operations and explored basic XML processing within PL/SQL
