SUMMARY

Highly self-motivated individual seeking placement in a company that values and utilizes analytical and technical skills, as well as comprehensive abilities. Dedicated to making a positive impact on both the company and personal growth through continuous learning and development.

EDUCATION

SNS College Of Technology - Coimbatore
BE - Electronics and Communication Engineering
CGPA-8.92

2021 - 2025

Vani Vidyalaya Matric Higher Secondary School - Salem
SSLC-83%
HSC-86%

2019- 2021

SKILLS

- Programming Languages : Java
 - Web Technologies : HTML, CSS, JavaScript
 - Tools : VS Code, Git, GitHub, MS Word, MS Excel, PowerPoint
 - Database : SQL
 - Soft Skills : Problem Solving, Creativity, Teamwork, Time Management, Adaptability
-

INTERNSHIP

- **Embedded Systems** at CraperSoft Pvt. Ltd
- **Web Development** at InternPe

19JUL-3AUG 2023

19FEB-17MAR 2024

ACHIEVEMENTS

- Paper Presentation on AI Enhancing Communicative Channels In Wireless Communication International Conference at SNSCT
 - Enterprise Design Thinking Practitioner and Co-Creator at IBM
 - Workshop on the topic of Vision Bot at NIT, Trichy
 - 12 Weeks NPTEL courses on introduction to industrial 4.0 & industrial IOT
 - Published a paper on "Vehicle-Based Estimator Insurance Using AI" in the International Journal of Novel Research and Development, focusing on leveraging AI for innovative vehicle insurance estimation models.
 - Presented my paper at International Conference on "Machine Learning Approach For Prediction and Separation of Biodegradable and Non Biodegradable Waste" at Karpagam Academy of Higher Education.
-

ACADEMIC PROJECTS

- **Anti-Sleep Alarm For Drivers** - In this project is to develop a device that can accurately detect sleepy driving and make alarms. It will help drivers to drive safely at night by "alerting them if they close their eyes for more than normal blinking.
- **Smart Car Parking System** - In this project is to develop a Smart Car Parking System using IR sensors to automate vehicle detection and optimize parking space utilization.
- **ML Approach for Prediction and Separation of Biodegradable and Non Biodegradable Waste** - Developed a machine learning model for the prediction and classification of biodegradable and non-biodegradable waste. Utilized data preprocessing, feature extraction, and classification algorithms to enhance accuracy. Implemented the solution to support efficient waste management systems.
