## EXPERIENCE

❖ **ASSOCIATE PROGRAMMER ANALYST**  
**KARYA TECHNOLOGIES** – Chennai  
July 2022 - Present

- Designed, developed, and deployed AL-based extensions for Microsoft Dynamics 365 Business Central (on-premises and cloud), enhancing system functionality and meeting specific client requirements.
- Customized core application components including Tables, Pages, Reports, and Code units using AL and legacy C/AL for tailored business workflows.
- Led the development and optimization of RDLC-based reports to support operational, financial, and management reporting requirements.
- Created and exposed APIs and web services (SOAP, OData) to enable seamless integration with external applications and third-party platforms.
- Executed complex data migration and transformation activities ensuring smooth transition from legacy systems to Business Central.
- Partnered with cross-functional teams during requirement gathering, gap analysis, and solution design, contributing to successful delivery across manufacturing, retail, and service domains.
- Provided post-deployment technical support and performance tuning to ensure client satisfaction and system stability.
- Participated in end-user training, documentation, and post-implementation support to ensure successful system adoption and user satisfaction.
- Contributed to internal code review processes and followed best practices for AL development, enhancing code quality and maintainability.
- Worked on upgrade projects migrating Microsoft Dynamics NAV (various versions) to the latest Dynamics 365 Business Central versions, both On-Premises and Cloud (SaaS)
