Skills & Qualifications

A highly innovative emerging IT professional with over 10 years combined experience in Customer success, Sales and Account management. A knowledgeable and experienced customer relationship manager keen on empowering customers to provide the best outcomes for themselves through excellent customer service by identifying, analyzing, and recommending best practices where necessary in line with their objectives.

- **Technical Skills:** proficient user of NetSuite ERP, QuickBooks, Zoho, Google docs (g-suite), and Microsoft Office suite, Docusign, Workday HCM, Sharepoint, Fintrak, SAP, ServicesHub.
- **Exceptional customer service skills,** continuously exceeding customer expectation with excellent service by interacting with clients daily to cross-sell, upsell and provide various solutions for their needs. Exceptional interpersonal, presentation and communication skills, with the ability to deal effectively with diverse clients from C level executives to frontline staff.

Experience

Microsoft

Apr 2024 – May 2025

Customer Success Account Manager

- Responsible for helping customers grow and consume their Unified contracts
- Actively spotted areas to maximize usage of existing licenses, to upsell and cross sell based on their business needs and best practices.
- Gathered and documented customer functional and technical requirements to deliver end-user training demos personally and alongside solution consultants.
- Stayed updated with the platform and product releases to be able to coach the client and provide advisory services on areas that suit their business needs and growth plans.
- Got involved with support escalations and provided timely resolution as needed
- Involved in resourcing and aligning resources to deliver workshops that drive value.
- Actively involved in contract renewals and ensuring retention and growth to ACR (annual consumed revenue) that align with customer priorities, securing a win for all parties
- Led regular project discussions with customers and project teams to review work plans, risks, actions, issues, and decisions that drove projects to completion and minimize “time to value”
- Was responsible for renewals and account management for customers in portfolio.

Oracle Corp

Aug 2021 to Apr 2024

Customer Success Manager

- Responsible for improving customer platform usage by understanding business plans and incorporating how the platform helps them meet their needs via effectiveness and efficiency post go-live support.
- Ensuring client satisfaction that would eventually lead to continued retention, renewal, advocacy, avoid churn and thus provide consistent ARR (annual recurring revenue).
- Tackles immediate pain points and areas not being optimized to ensure the customer obtains value from their investment on the platform. Also assist to create and update the team’s playbook.
- Experience in working with customers to organize processes and how best to fit that with the system and optimize report viewing and other areas of their operations.
- Able to manage the process flows from ‘Design to Build’, ‘Procure to Pay’ up to ‘Record to Report’ and everything in between that helps optimize the customer process to the system capability
- Coaches and regularly interact with team members to share helpful tips or new releases and info that may impact our clients and help create a smooth onboarding environment for new hires.
- Carries out regular KT (knowledge transfer) sessions to share knowledge and information about several customers under my portfolio with different teams in the company.
- Work closely with several teams/touchpoints in the customer lifecycle to create best experience for the clients under my purview. Teams include Account management, Professional services, Implementation consultants, Project managers, and Customer care personnel.

- I was the first team member to be CertiFived - passing all 5 main Netsuite certifications, due to understanding of the core concepts guiding the platform usage and setup.
- Successfully diffused difficult client situations which stemmed from our platform usage, unresolved implementation pain points and other client usability issues, which when resolved led to over 80% of them becoming advocates of our ERP.

ATB Financial

Nov 2019 – Jan 2021

Relationship Manager

- Analyzed client information using decision support platforms, such as SAP and CRM to inform decision making regarding loans, mortgages, etc.
- Collaborated with IT staff on the UX and UI product design team, as the branch champion to enhance client experience and give feedback on the deployment of our latest inhouse online banking platform.
- Supported other teams by on-boarding new clients and conducting business development: suggesting leads, referrals and providing enhanced customized product packages to suit client's needs.
- Gathered and analyzed customer requirements as well as translating underlying business needs to solution architecture. Design of system configuration and custom reporting for clients.
- Acted on gathering client requirements, creating solution design, providing recommendations to clients on best practices, as well as supporting the clients' resources throughout the various phases of the project.
- Easily discussed technical subjects with technical and non-technical audiences.
- I was the branch technical champion for onboarding clients to our self-serve digital options due to my dexterity with digital tools and ability to pass on information to clients in an efficient manner.

Access Bank PLC

Dec. 2013 – Apr. 2019

Account Manager

- Was the client relationship liaison person for B2B/B2C enterprise software and SAAS companies we worked with, and I was responsible for interpreting and delivering client expectations on assigned projects.
- Responsible for the pre-sales and pre-upgrade survey that was done prior to developing our inhouse banking platform called Primus plus.
- Actively marketed the bank's platform and held several joint meetings with the technical teams that involved various levels of answering questions, analyzing needs, integration, file feeds, API connectivity and business understanding.
- Successfully broke down ambiguous problems into concrete, manageable components for client and our inhouse teams and we all worked through optimal solutions.
- Worked with the consultants on the viability of an inhouse built system vs a vendor purchased platform. We eventually went with the inhouse solution due to easily identifiable perks, cost savings, upgrade and flexibility.
- Created a process for monitoring and maximizing the vendor management system that reduced the operational costs by 25% and fine-tuned the monthly performance reporting process for the team that improved accuracy and timely rendition of reports from 75% to 100% accuracy rate.
