PROFESSIONAL SUMMARY

Aspiring Microsoft Dynamics 365 Finance Operations (FO) Technical Consultant with hands-on experience gained through academic training and practical ERP development. Passionate about building, customizing, and optimizing enterprise solutions using X++, SSRS, and Data Entities. Eager to contribute to real-world D365 implementations while continuously learning and growing in a dynamic consulting environment.

TECHNICAL PROJECT EXPERIENCE

Student Leave Management System(Microsoft Dynamics 365 F&O)

Role: Technical Consultant (Academic Project)

Description:

Developed a comprehensive ERP module in Microsoft Dynamics 365 Finance & Operations (F&O) to manage student records and automate leave application process. The project focused on enhancing process efficiency through dynamic data structures, workflow automation, and SSRS -based reporting.

Key Contributions:

- Designed and implemented custom Tables, Forms, EDTs, and Enums for managing student and leave data.
- Developed X++ business logic for leave calculation, validation, and process automation.
- Built SSRS reports for leave summaries and real-time status tracking.
- Created Data Entities for data import/export and system integration.
- Utilized Azure DevOps for version control and deployment pipeline management
- Applied extension-based development for upgrade-safe and maintainable customizations.

TECHNICAL SKILLS

- **Languages & Development:** X++,
- **ERP Platform:** Microsoft Dynamics 365 Finance & Operations
- **Core Technical Areas:** Tables, Forms, EDTs, Enums, Extensions, Data Entities
- **Reporting:** SSRS Report Design and Customization
- **Database:**T-SQL
