PROFESSIONAL SUMMARY

Power Platform Developer specializing in end-to-end low-code enterprise solutions using Microsoft Power Apps, Power Automate, Dataverse, SharePoint, and Copilot Studio. Skilled in designing modern Canvas and Model-Driven Apps, automating workflows, and integrating data systems to enhance business productivity and decision-making. Completed 15+ successful Power Platform projects delivering measurable impact across finance, HR, and operations. Passionate about leveraging the Power Platform ecosystem to drive innovation, scalability, and efficiency.

EXPERIENCE

SOFTWARE DEVELOPER – We Succeed Solutions | Bangalore, India | March 2023 – November 2025 (2.8 Years, Immediate Joiner)

Key Projects

- **Global Financial Budgeting System** – Built a Power Apps-based financial management solution to monitor budget vs actuals across multiple countries. Integrated Power Automate and SharePoint for approvals, data storage, and Excel report automation, improving financial visibility and control.
- **Document Management System** – Developed a Power Apps and SharePoint-based document management solution with a two-level approval process for document upload and updates. Enabled secure storage, version control, and automated workflows using Power Automate, improving accuracy and compliance.
- **HR Management Portal** – Created a centralized HR Management system using Power Apps, SharePoint, and SPFx components for employee self-service. Integrated modules for leave management, expense claims, attendance tracking, and payslip access. Enabled employees to manage submissions and HR to track approvals efficiently.
- **Performance Tracking App** – Designed a Power Apps solution for project performance monitoring. Implemented features to assign projects, track completion percentage, and visualize progress using a modern, interactive UI for project managers.
- **Issue Tracking App** – Developed a centralized issue tracking system using Power Apps and Dataverse, allowing employees to log issues, monitor status, and receive real-time updates. Implemented secure Dataverse tables for issue data, assignments, and status history. Added dashboards to track team performance and resolution time, and automated notifications/SLA alerts using Power Automate to reduce manual follow-ups.
- **Guest User App** – Developed a Guest User Management App to add external users, remove users from security groups or the environment, and automate user invitations using Microsoft Graph API. The system sends guest invitations through Graph API, tracks acceptance, and automatically removes users who do not accept within the defined time.

Implemented secure approval flow and full audit tracking using Power Automate and Dataverse.

• **Hiring & Recruitment Management App (Model-Driven + Dataverse)** – Built an end-to-end Hiring App using Model-Driven Power Apps and Dataverse. Designed a recruitment process where candidates submit job applications through Microsoft Forms, and Power Automate automatically adds each submission into Dataverse. Provided HR with controlled access to the Model-Driven App to update candidate details, track hiring stages, and manage evaluations. Configured three key views — Hired, Pending, and Rejected — enabling HR to monitor recruitment progress efficiently and maintain complete hiring history.

EDUCATION

Bachelor of Engineering (ME), SSIT Tumkur – June 2022

TECHNICAL SKILLS

- Microsoft Power Platform: Power Apps (Canvas & Model-Driven), Power Automate, Dataverse, SharePoint
- Tools: Copilot Studio, SPFx, Power Fx, Solution Packaging, Environment Management
- Web Technologies: HTML, CSS, JavaScript
- Other: Process Automation, Dashboard Design, AI Copilot Integration

PROFESSIONAL ACHIEVEMENTS / HIGHLIGHTS

- Delivered 15+ enterprise-grade Power Platform applications improving operational efficiency by up to 40%.
- Automated manual HR, finance, and approval processes using Power Apps and Power Automate reducing workload by 60%.
- Designed modern UI Canvas Apps adopted by 100+ users across multiple departments.
- Collaborated cross-functionally to integrate Power Platform apps with SharePoint, Dataverse, and Teams for seamless data flow.
- Recognized for delivering scalable and user-centric business solutions within tight deadlines.

TECHNICAL ENVIRONMENT

Power Apps, Power Automate, Dataverse, SharePoint Online, SPFx, Microsoft Teams, Power Fx, Copilot Studio, Azure, HTML, CSS, JavaScript, Solution Packaging

SOFT SKILLS

Problem Solving, Communication, Collaboration, Analytical Thinking, Agile Development, Client Interaction, Continuous Learning
