LinkedIn: <https://www.linkedin.com/in/yarnagu-kavyarshitha-72b3ba182/>

Skills

- **Languages:** AL, CAL, SQL, Python, basics of Java.
- **Technology:** Microsoft Azure, Docker, Microsoft Business Central 365, Microsoft Dynamics NAV, Azure DevOps, ATDD, Debugging, RDLC, Power Automate, Visual Studio, Agile Development, Power Apps, .NET Framework, Software Development, ERP.

Certifications

MB-820: Microsoft Dynamics 365 Business Central Developer Associate – July 2025

- Validated skills in AL language development, extension design, testing, and deployment in Business Central.
- Demonstrated expertise in upgrading, integrating, and customizing Business Central solutions using modern development practices.

Work Experience

Engineer, Aptean India Private Ltd, August 2024 – Present

- Spearheaded product enhancement initiatives and led multiple integration projects to expand system capabilities and improve functionality.
- Demonstrated expertise in resolving critical, severity-level, and high-priority bugs with a 99% success rate in testing and timely delivery of fixes.
- Led product release activities, including managing and resolving product bugs, ensuring 99% on-time delivery of updates and enhancements.
- Actively contributed to multiple go-live projects by resolving critical issues within tight deadlines, achieving a 95% on-time resolution rate.
- Successfully integrated various eCommerce platforms, including WooCommerce, with Microsoft Dynamics 365 Business Central, streamlining operations and enhancing the customer experience.
- Developed and integrated APIs using OData and RESTful services, enabling seamless data exchange between Business Central and external systems.
- Provided technical leadership and mentorship to team members, guiding them through bug resolution processes and fostering collaboration with cross-functional teams.

Associate Engineer, Aptean India Private Ltd, August 2022 - July 2024

- Designed and implemented customized solutions in Microsoft Dynamics 365 Business Central, tailored to meet specific business requirements and enhance operational efficiency.

- Developed **ATTD (Automated Time and Task Distribution)** functionality for the Rental module using **Microsoft Copilot**, significantly enhancing system performance, automation, and user efficiency.
- Handled support incidents raised as tickets by analysing and resolving issues with clear setups, detailed processes, and thorough documentation to ensure long-term resolution.
- Experienced across the full software development lifecycle—including analysis, design, coding, testing, and deployment—while handling both enhancements and new feature development.
- Delivered detailed **Root Cause Analysis (RCA)** along with timely fixes, ensuring clarity and faster validation by the testing team.
- Involved in upgrade activities, transitioning Microsoft Dynamics 365 Business Central from one version to another during new release cycles.

Intern, Aptean India Private Ltd, January 2022 - August 2022

- Started as an intern at **Aptean** in January 2022, building a strong foundation in ERP systems with a focus on **Microsoft Dynamics 365 Business Central** and **Navision**, gaining hands-on experience in real-world business scenarios and system development.
- Proficient in debugging and resolving system issues, contributing to enhanced performance and user experience.
- Skilled in identifying, analysing, and fixing issues in both new and existing RDLC reports, ensuring data accuracy and report efficiency.
- Hands-on experience across multiple Business Central modules, including **Sales, Service, Rental, Equipment, Fixed Assets, Parts, Manufacturer, Model, Dimensions, Chart of Accounts, Transfers, Sales Prices/Price Calculation, Cross Docking Functionality, and Requisition**, enabling broad functional expertise and solution design.

Education

Sathyabama Institute of Science and Technology Chennai **June 2018 - Jun 2022 B.E. in Computer Science and Engineering CGPA: 8.97/10**

Projects

- **Churn Prediction in ML using ANN(2022)** : Using a Kaggle dataset, this project aims to predict whether a customer will churn (leave the bank) by leveraging Artificial Neural Networks (ANN) in Machine Learning (ML). The trained ANN model effectively analyzes customer behaviour to enhance retention strategies. Additionally, it provides valuable insights into the key factors influencing churn, enabling banks to take proactive measures to improve customer loyalty.
- **Cloud-Based Production Mirroring Solution (2024)**: Designed and implemented a cloud-based production mirroring solution using **Azure Services, Docker, Flask**, and **REST APIs**. This solution optimized SLA adherence and significantly reduced **MTTR** (Mean Time to Repair) from **2-7 days** to just **3 hours to 1 day** by enabling rapid issue replication, root cause analysis (RCA), and efficient resolution.

Awards & Recognition:

- **GEM Award for Agility:** Recognized by management for demonstrating exceptional agility in project execution and problem-solving.
- **Cheers Award:** Honoured for outstanding performance and contribution to team success.

Publications:

Research Paper: Published in the 2022 IEEE Conference held in Chennai on "Churn Prediction in Machine Learning using Artificial Neural Networks (ANN)"
