Professional Summary

A Software Engineer with 3.4 years of experience in Microsoft Dynamics Business Central. I have extensive experience in the implementation, customization, and optimization of ERP solutions to effectively support strategic business objectives. I have a proven ability to collaborate with cross-functional teams to ensure the successful delivery of high-quality projects within established timelines and budgetary constraints.

Experience

PreludeSys India LTD

Chennai

Software Engineer - BC

05/2023 - Present

- Developed and maintained extensions and AL code to support robust inventory and stock management features.
- Identified and resolved performance bottlenecks in BCPT codeunits, improving system efficiency.
- Provided performance support and optimization for **concurrent users** in Microsoft Dynamics 365 Business Central, ensuring smooth system responsiveness during peak usage periods.
- Worked on a BC implementation project until Go-Live.
- Stayed updated with the latest releases and upcoming updates in Business Central to provide clients with the most current features and improvements.
- Handled BC compatibility checks and code fixes for BC24, BC25, BC26.
- Integrated Business Central with SAP, PowerApps, Warehouse Insights, and Power Pick systems for enhanced operational workflows.
- Developed **RDLC reports** and customized standard reports in Business Central to meet specific customer requirements.
- Worked as a **Business Central developer** in Agile teams, delivering high-quality code through iterative sprints and continuous integration to meet evolving business needs.

Great Innovus Solutions

Madurai

Associate Software Engineer

03/2022 - 02/2023

- Collaborated on the design and development of tables, pages, and codeunits for various ERP processes.
- Customized and validated Sales and Purchase modules based on business requirements.
- Gained hands-on experience with API concepts and integration.
- Handled multiple integrations with third parties to Business Central (Power Apps & Power Automate for flows).
- API Development – Converting custom Web Services into APIs for Third-party Integration.

Education

Anna University Regional Campus Madurai

Madurai

B.E Computer science engineering

06, 2018 - 05, 2022

- SQL

Courses

MB-800: Microsoft Dynamics 365 Business Central Functional Consultant Associate

Projects

TMHNA (Toyota Material Handling, North America) – Dealer Management System

- This is a BC SAAS migration with multiple new customizations and Integration.
- Customized ERP modules—including Sales, Service, Purchase, and Advanced Warehousing—in Business Central to tailor solutions that meet client-specific business requirements.
- Developed and maintained **automation codeunits** in Microsoft Dynamics 365 Business Central to streamline business processes and reduce manual intervention.
- Conducted **performance analysis and optimization** of AL code, improving system response times and reducing execution delays across key modules.
- Enhanced **Insight Works** modules (e.g., Warehouse Insight) to align with custom business requirements, resulting in increased operational efficiency.
- Developed and **implemented integration between Microsoft Dynamics 365 Business Central and Power Apps**, enabling seamless data exchange and extending ERP functionality to mobile and web-based custom applications
- Developed and implemented **Kardex system integration** with Microsoft Dynamics 365 Business Central to automate inventory management, improve warehouse operations, and ensure real-time stock synchronization.
- BC compatibility checks and compatibility code fixes for each BC release to maintain warning-free source codes.
- Performance Analysis through developing BCPT and optimization.
- Worked with **Azure DevOps** for version control, continuous integration, automated deployments, and project management to support Business Central development.
- Developed and deployed Microsoft Dynamics 365 Business Central solutions using **Docker containers**, enabling consistent and efficient development and testing environments.
- Part of the Parts module team to handle multiple customer requirements.
- Created **C# Azure Functions** and connected them to Business Central through AL HttpClient for real time API integration.
- Reviewed, Optimized and maintained **MySQL** database to ensure data integrity, performance tuning, and accurate synchronization with ERP systems.
