Seeking a role where I can use my skills and experience to contribute to the organization's success while continuing to learn and grow in a challenging environment.

PROFILE SUMMARY

- 4 years of experience as a Software Engineer in the field of **Microsoft Dynamics Business central** specializing in development, customization, and implementation projects.
- Proficient in utilizing Microsoft Business Central to streamline business processes, optimize performance and enhance operational efficiency for a wide range of clients.
- Proficient in AL and C/AL programming languages, enabling seamless customization and development within the Microsoft Business Central environment.
- Successfully addressed customer-specific bugs and enhancements, consistently delivering high-quality products within designated timelines.
- Experienced in working on EDI (Electronic Data Interchange) and Pack & Ship products, automating processes such as sales order and purchase order processing, warehouse management, inventory management, and logistics.
- Committed to providing realistic project deadlines, ensuring timely delivery and client satisfaction.
- Proficient in analyzing complex business scenarios and developing effective strategies using Microsoft Business Central.
- Exceptional problem-solving abilities coupled with strong technical and effective communication skills.

EDUCATION

2021 B. Tech in Information Technology from Panimalar Engineering College, Chennai with 86% marks.

WORK EXPERIENCE

Job Title: **Engineer, Development**

Organisation: **Aptean India Pvt Ltd**

- Worked in Customer Success Team, resolving high-priority bugs in **Microsoft Business Central 365**.
- Worked proficiently with the latest releases of Business **Central** and **Navision** legacy versions.
- Proficient in **AL and CAL** coding languages as a developer.
- Utilized **Azure DevOps**, including **Pipelines** and **Repositories**, for streamlined development processes.
- Customized Business Central functionalities to align with specific client requirements, enhancing overall satisfaction.
- Managed internal Microsoft Business Central development environments and containers, including restoring databases as needed.
- Contributed to various **upgradation projects of Business Central (from CAL to AL)**, **Down gradation projects**, **Object Merging**, and **XML port creation**.

- Proficient with connector applications like **EDI (Electronic Data Interchange)** and **Pack & Ship (PNS)** products, including label and package creation.
- Assisted junior team members in learning and improving by sharing knowledge through mentoring sessions.
- Engaged directly with clients to troubleshoot issues, address concerns, and ensure timely resolution.
- Collaborated with Project Managers, Business Analysts, and Site Reliability Engineers to ensure seamless project execution and alignment with business objectives.
- Served as a **Level 1 Reviewer**, responsible for reviewing code to maintain quality and adherence to standards.
