-

PROFESSIONAL EXPERIENCE

Direction Software LLP – Technical Consultant

2022 – Present / Mumbai, India

- Deliver end-to-end technical solutions for Microsoft Dynamics 365 Business Central (Cloud & On-Prem) and NAV, including development, integration, testing, and Go-Live support.
- Design and develop custom Business Central extensions using AL based on detailed client requirements.
- Handle complex third-party integrations using REST APIs, OData, SOAP, and Webhooks.
- Actively participate in client discussions, requirement analysis, solution design, and technical decision-making.

- Manage production support, bug fixing, performance optimization, and system enhancements for multiple live customers.

Key Projects & Implementations

1. NAV 2016 to Business Central 21 Upgrade – GMG (Dubai)

- Played a key technical role in upgrading Navision 2016 to Business Central 21 (On-Prem).
- Performed object conversion, data migration, testing, and post-upgrade stabilization.
- Supported Go-Live activities and resolved upgrade-related issues.

2. Customization & E-Invoice Integration – Sodexo India

- Implemented Vendor Validation API with Business Central using third party site to validate vendor No and compliance details.
- Customize E-Invoice & E-way bill integration for Protean(formerly NSDL e-Governance Infrastructure) service with business central for Posted sales invoice data.
- Implemented automated bank reconciliation process for YES Bank, enabling seamless bank statement import and reconciliation in Business Central, significantly reducing manual effort.

3. End-to-End API Integration – The Knowledge Academy (UK)

- Designed and developed end-to-end API integrations between Business Central and third-party systems.
- Implemented real-time data exchange, validation, and automation of business processes using Webhook.
- Coordinated directly with UK-based stakeholders for requirement clarification and delivery.

4. HR System Integration – GFOW (Dubai)

- Integrated third-party HR systems with Business Central for employee and payroll-related processes.
- Automated data synchronization to reduce manual intervention and improve accuracy.

5. Customization, Automation & Support (Multiple Clients)

- Delivered customizations, process automation, and ongoing support for project(Helimer Medisynth ,DCB Bank ,GIS).
- Developed reports, processing logic, and system enhancements tailored to business needs.
- Implement SharePoint and OneDrive integrations using Microsoft Graph APIs.
