**Professional Summary** — Detail-oriented and technically strong consultant with hands-on experience in developing custom solutions using Microsoft Dynamics NAV/Business Central, Power Automate, Dataverse, and Power Pages. Skilled in creating RDLC/Word reports, developing event-driven extensions, and integrating external systems using Power Platform. Proven track record of delivering clean, testable, and scalable business applications in real-world ERP scenarios.

## Skills

- **Business Central / NAV:** AL, CAL, Codeunits, API Pages, RDLC, Extensions, Event Subscribers
- **Power Platform:** Power Automate, Power Pages, Power Apps, Dataverse
- **Programming:** AL, CAL, C, C++ , Dart, Flutter , DSA
- **Tools:** Git, Postman, Firebase, SharePoint
- **Soft Skills:** Team Collaboration, Testing, Documentation

## Experience

### All e Technologies

Feb 2023 – Present

*Technical Consultant*

- Engineered and deployed robust custom extensions across various versions of Microsoft Dynamics 365 Business Central, enhancing system modularity and performance.
- Designed and delivered RDLC and Word-based reports tailored to business needs, and built custom utilities for seamless data migration and workflow automation.
- Spearheaded the integration of third-party systems with Business Central using Power Automate and Dataverse, automating critical processes and reducing manual intervention.
- Developed sophisticated Power Pages portals featuring multistep forms, secure file uploads, and real-time Dataverse record manipulation to streamline user experiences.
- Implemented complex permission sets, security role hierarchies, and event-driven business logic using AL and subscriber patterns.
- Designed and maintained Azure DevOps pipelines for continuous integration and deployment (CI/CD) of Business Central extensions, ensuring smoother version control and faster delivery cycles.

### Bright Infonet

Jul 2022 – Sep 2022

*Flutter Developer Intern*

- Built intuitive and responsive mobile applications using Flutter and Dart, delivering cross-platform compatibility and modern UI/UX.
- Integrated Firebase for secure real-time data management, user authentication, and backend connectivity.

## Education

### Ajay Kumar Garg Engineering College, Ghaziabad

*B.Tech – Computer Science*

2019 – 2022 — CGPA: 7.9

### The Rajasthan International School

*XII – PCM*

2018 — 78.4

### **Support and Customization of Navision in HCL Technologies**

- Project : HCL Technologies
- Backend: SQL Server 2014
- Technologies Used: Microsoft Dynamics NAV 2016
- Modules: All Modules
- Roles and Responsibilities: Provided technical support for Navision, covering all customizations, report development, and integrations.

### **Support and Customization of Navision in Radiance Renewables**

- Project : Radiance Renewables
- Backend: SQL Server 2014
- Technologies Used: Microsoft Dynamics NAV 2016
- Modules: All Modules
- Roles and Responsibilities: Provided technical support for Navision, covering all customizations, report development, and integrations.

### **Support and Customization of Navision in EFFKON**

- Project : EFFKON
- Backend: SQL Server 2014
- Technologies Used: Microsoft Dynamics NAV 2016
- Modules: All Modules
- Roles and Responsibilities: Provided technical support for Navision, covering all customizations, report development, and integrations.

### **Support and Customization of Bussiness Central in HCL Technologies**

- Project : HCL Technologies
- Technologies Used: Microsoft Dynamics Business Central and power platform
- Modules: All Modules
- Roles and Responsibilities: Provided technical support for Business central, covering all customizations, report development, and integrations.

### **Support and Customization of Bussiness Central in EFKKON**

- Project : EFKKON
- Technologies Used: Microsoft Dynamics Business Central
- Modules: All Modules
- Roles and Responsibilities: Provided technical support for Business central, covering all customizations, report development, and integrations.

### **Upgration of Navision 2016 to Business Central in HCL Group**

- Project : Microsoft Dynamics 2016 Upgration
- Client Name : HCL Group
- Backend: SQL Server 2014
- Technologies Used: Microsoft Dynamics NAV 2016, Business Central
- Modules: All Modules
- Roles and Responsibilities:
  - 1. Migrated the EPC Vertical from NAV 2016 to Business Central, including complete data migration.
  - 2. Upgraded all NAV 2016 objects to Business Central using the AL Conversion Tool.
  - 3. Migrated customized and modified base tables and codeunits to the Business Central AL model.
  - 4. Validated and tested post-upgrade functionality to ensure smooth transition.
