EDUCATION

- **SSLC** in **Kamma Mahajana Trust Hr Sec School** (State Board Syllabus) **2016-2017**
- **HSC** in **SHN Ethel Harvey Girls Hr Sec School** (State Board Syllabus) **2018-2019**
- **B.E CSE** in **DR.NGP Institute of Technology** (Anna University 2017 & 2019 Regulation) **2019-2023 - CGPA : 8.34**

SKILL

- **Dynamics 365:** Experience in working with business applications, workflows, and enterprise-level data handling.
- **Java:** Solid understanding of object-oriented programming and backend logic implementation.
- **MySQL:** Strong database querying, optimization, and management with advanced-level certification.
- **HTML, CSS, JavaScript:** Proficient in building clean UI layouts and interactive web interfaces.
- **API Development:** Experience connecting services and integrating back-end logic with client applications.

EXPERIENCES

CETAS Info Tech Pvt Ltd (Jan 2024 - Present)

ERP & Software Developer

- Develop and support ERP-based business solutions using Dynamics 365
- Perform data handling, system testing, and API integration
- Troubleshoot ERP issues and ensure data integrity
- Collaborate with cross-functional teams for feature implementation and system enhancement

Augusta Hitech Soft Solutions (Jan - Dec 2023)

Software Developer

- Assisted in full-cycle software development and code implementation
- Contributed to building user features and UI components
- Supported debugging, testing, and deployment activities

CERTIFICATIONS

- MySQL Advanced Level — Udemy
- HTML & CSS — Coursera

INTERSHIP

Nitroware - Trainee | Jan 2021 – Nov 2021 | Coimbatore

- Hands-on experience in software development fundamentals and practical implementation

PROJECTS

1. Custom Barcode Scanning API Integration

- Designed and implemented APIs in Business Central to support barcode scanning workflows.
- Created staging tables and automated posting processes using job queue reports.
- Handled source type, source ID, and transaction mapping for real-time data sync.
- Ensured fast and accurate barcode-driven item, purchase, and warehouse transaction updates.

2. Bulk Purchase Invoice Automation

- Built a solution to generate purchase invoices in bulk using user-defined filters.
- Automated invoice generation replicating Business Central's Get Receipt Line logic.
- Prevented reprocessing of previously invoiced GRNs.
- Delivered complete automation used by finance & procurement teams.
- Version: 21-03-2025 | v1.0.0.0

3. Budget Control & Financial Governance Enhancements

- Added Current Active Budget parameter in General Ledger setup.
- Enhanced Purchase Orders with a Budget FactBox for real-time financial impact.
- Implemented validations: permissions, approval flows, tolerance levels.
- Improved financial transparency and compliance.

4. Azure AI OCR – Automated Text Recognition

- Integrated Azure AI Document Intelligence for digitized document scanning.
- Extracted OCR text into Business Central using custom AL logic.
- Significantly reduced manual data entry time.

5. Copilot Integration for Business Central

- Developed Copilot-enabled experience inside BC.
- Designed custom prompts and automation flows.
- Improved operational productivity through AI-driven suggestions.
