Technical Work

Microsoft Dynamics 365 Business Central (AL Development)

- Designed and developed custom reports including GST Register, Sales Register, Purchase Register, Tax Invoice, and Matrix Reports based on business requirements.
- Created and extended Report Extensions to enhance standard reporting functionality.
- Developed multiple XMLports for seamless data import/export.
- Built and customized Pages and Page Extensions to meet specific business needs and improve user experience.
- Developed Codeunits and Event Subscribers to extend standard Business Central functionality using AL events.
- Designed and implemented custom tables for Fixed Asset modules.
- Created Table Extensions for standard Business Central objects.
- Worked on Data Exchange Framework (DEF) for structured file imports (bank statements, external data files) with minimal custom AL code.
- Implemented custom validation logic to enforce mandatory fields.
- Implemented custom business logic for transaction processing based on client-specific workflows.

Integrations & Automation

- Integrated multiple third-party APIs with Business Central for automation and seamless system communication:
CH Robinson – Logistics process integration
Foodics – POS integration
Supy – Inventory & procurement integration
- Implemented ICICI Bank Payment Integration for real-time payment processing and reconciliation within Business Central.
- Developed Pine Labs POS Integration for automated payment capture and transaction synchronization.
- Integrated 3D Website / Configurator with Production BOM.
- Implemented API-based automation.
- Developed Google Sheets Integration for data synchronization and reporting.
- Built custom API endpoints in Business Central to expose data for external systems.
- Designed error handling and logging mechanisms for API integrations and data imports to improve reliability.
