Projects

1. Park+

Domain: Smart parking solution for corporate

Role: This was a support project, and my role was to enhance and customize ERP as per the customer's requirements. In addition, I work as a technical consultant in D365 Business Central.

2. EdTech

Domain: Online software for education technologies

Role: Worked as a technical consultant in MS Dynamics Business Central; I was primarily responsible for gathering requirements from functional consultants for development, designing reports, new role center pages, page customization, table customization, and XML port for data import and export.

3. Dee piping

Domain: Piping solutions for industries such as oil and gas and power

Role: As a technical person on this project, my primary roles and responsibilities were object merging. As the client was making a shift from Navision to Business Central, I had the task of merging all the objects, keeping in mind the customizations that were done in Navision for the client.

4. TeknoDome

Domain: TeknoDome is a preferred distribution conglomerate for global brands

Role: Business Central Technical Consultant for TeknoDome, delivering tailored customizations in Microsoft Dynamics 365 Business Central to meet specific client requirements Responsibilities included designing and enhancing objects such as tables, pages, reports, and codeunits, along with developing robust APIs to facilitate seamless data integration between the CRM system and Business Central.
