

Profile Summary

Experienced Microsoft Dynamics 365 Business Central Techno-Functional Consultant with 3 years of experience in retail implementations, POS systems, and ERP solutions. Skilled in end-to-end implementation of LS Central (Retail, POS, Back Office), AL development, integrations, and reporting. Strong domain expertise in retail operations including inventory management, promotions, and financial workflows. Hands-on experience with APIs (REST/OData), Power BI, and cloud-based Business Central deployments.

Professional Skill

- **Technical Skills:** AL, C/AL, SQL, XML, JSON, SOAP APIs, OData APIs, OAuth, RDLC, SSRS, Web Services, Power BI, Python (Basic), C# (Basic), Postman, Debugging, Visual Studio Code, Business Central Development Tools
- **ERP & Platforms:** Microsoft Dynamics 365 Business Central (On-Prem & Cloud), Microsoft Dynamics NAV 2018
- **Tools & Technologies:** Microsoft SQL Server, Visual Studio Code, Beyond Compare, Microsoft Excel, Microsoft Word
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication Skills, Team Collaboration, Adaptability
- **AI & Productivity Tools:** ChatGPT, GitHub Copilot, Gemini, DeepSeek

Education

BE Computer Science2019-2023

Work Experience

Evoluzione - Retail | Senior executive IT (Navision)

Sep 2025 - Present

- Delivered techno-functional solutions in Microsoft Dynamics NAV 2018 / Business Central, enhancing retail, finance, and warehouse operations through system configuration and AL-based customizations.
- Designed and developed business reports using Power BI, SQL, and Python, enabling accurate data analysis and improved decision-making.
- Collaborated with Retail, Finance, Supply Chain, and IT stakeholders to gather requirements, identify process gaps, and implement end-to-end ERP solutions.
- Provided functional support, user training, and post-implementation assistance, ensuring smooth adoption of POS, inventory, and financial workflows.

Inatech Indian Private Limited | Associate Software Engineer

June 2023 - Aug 2025

- Developed and customized tables, pages, reports, and codeunits in Microsoft Dynamics NAV and Business Central to enhance ERP functionality and deliver client-specific solutions.
- Supported and optimized integrations using SOAP/ODATA APIs and XML/JSON, resolving 250+ data-sync and system integration issues across multiple clients.
- Configured and managed 25+ NAV/BC cloud environments (NAV 2018, BC20-BC25) for UAT, QA, and Production, ensuring smooth deployments and stable operations.
- Assisted in major cloud migrations (NAV → BC22/24/25), performing data validation, functional testing, environment setup, and providing go-live support, including independent management of a Cloud 2025 migration.
- Supported .NET-based integrations and API services, handling XML/JSON payloads and backend validations.
- Delivered training, support, and process optimization solutions, enhancing user adoption and operational efficiency across multiple client environments.

Self-Developed Project

- Developed an **Invoice Replication Bot** in Business Central to automate test invoice creation and streamline internal unit testing.
- Designed a custom page to fetch production invoice data via API and auto-create missing master records (customers, items, dimensions) for complete data replication.
- Enabled accurate replication of real production invoices in STG, improving testing efficiency, validation accuracy, and reducing manual errors.

Projects

Project #7 | Warehouse & NAV/Business Central Support | BC25 Cloud (Sep 2025 – Present)

- Provided ongoing warehouse , retail management and NAV support, ensuring smooth daily operations.
- Handled error resolution and system issues, troubleshooting master and transactional data discrepancies.
- Maintained data integrity across retail locations, preventing operational disruptions.
- Coordinated with cross-functional teams to implement process improvements and ensure seamless adoption.

Project #6 | Automated Financial Reporting | Python 3 & Power BI (Sep 2025 – Present)

- Automated weekly and monthly financial reports for retail clients using Python 3 and Power BI.
- Integrated data from finance and warehouse systems to generate consolidated, real-time dashboards.

Project #5 | NAV 16 → Business Central Upgrades & Cloud Migration (Dec 2023 – Aug 2025)

- Executed cloud upgrades from NAV 16 → BC24 → BC25, ensuring data integrity and smooth migration.
- Managed environment setup, configuration packages, and API-based data validation for multiple clients.
- Performed unit testing, go-live support, and post-implementation troubleshooting, including API and integration fixes.
- Redesigned Sales, Purchase, and Credit Memo reports using RDLC/Word layouts and AL code enhancements.

Project #4 | Business Central Integrations & API Development (Jan 2024 - May 2024)

- Developed third-party payment integration using C# and AL, improving transaction efficiency.
- Built ODATA and SOAP API pipelines to extract and expose ERP data for external systems.
- Implemented a unified data model across 16 clients, ensuring accurate data mapping, performance optimization, and secure API access.
- Supported third-party add-on integrations, validating data flows and API endpoints.

Project #3 | Data Migration, Environment Setup & Go-Live Support (Dec 2023 – Aug 2025)

- Executed NAV16 → BC22 migration using configuration packages and API-based data validation.
- Upgraded BC22 → BC25 Cloud, ensuring API compatibility, performance optimization, and seamless external integrations.
- Redesigned key reports and layouts for Sales, Purchase, and Credit Memo documents with enhanced AL and RDLC/Word features.
- Provided post-implementation support, resolving migration defects, validating master data, and ensuring smooth go-live.

Project #2 | Report Customization & Document Automation (Sep 2023 – Dec 2023)

- Developed and customized Sales Invoice and Credit Memo templates (English + localized) using RDLC/Word.
- Integrated templates with ODATA services to automate document delivery workflows.
- Performed master data validation, functional testing, and compliance checks to ensure accuracy.
- Assisted functional teams with output formatting and automated reporting validations.
-

Project #1 | NAV/BC Customizations & Change Requests (Jun 2023 – Aug 2023)

- Delivered customizations across tables, pages, reports, and codeunits in NAV and Business Central.
- Fixed FO ↔ BC/NAV integration issues, optimizing API calls, XML/JSON payloads, and event-driven extensions.
- Managed cloud and on-premise environments, including setup, configuration, and ongoing support.
- Improved system reliability, reduced downtime, and provided end-to-end functional and technical support.
