PROJECTS

E2E Rail

E2E Rail is a leading provider of railway supply chain solutions and a premier railway system integrator in India.

Key Responsibilities:

Designed and developed custom workflow templates to automate and streamline approval processes across various business documents.

Implemented SharePoint integrations with Business Central to enhance document management and collaboration capabilities.

Created and maintained API pages to enable seamless third-party integrations and system interoperability.

Led the development of a tailored Contract Management Module to support project lifecycle and compliance tracking.

Diagnosed, troubleshooted, and resolved system issues and bugs, ensuring high system availability and user satisfaction.

Showman AI Builder

Project Type: API Development & Logistics Automation

Worked with CRM team to automate logistics document creation.

Developed API pages for inward, outward, and purchase invoice processing.

Built staging table validation architecture for API-based order creation.

Implemented error logging and automated email notification process.

Developed unbound actions for warehouse posting and item tracking.

Nav Build

Nav Build is our own product, Nav Build is designed to efficiently handle the demands of engineering & construction enterprises.

Key Responsibilities:

Worked on bug fixing and performance optimization across key functional modules such as:

Project Management

Promotion Management

Material Management

Implemented robust error-handling mechanisms to improve system stability and user experience.

Enhanced product capabilities by adding new features to replace or improve upon deprecated functionalities.

Collaborated with cross-functional teams to ensure smooth deployment and testing.

ABS (Support Nav)

Experienced in providing client support and issue resolution for the ABS system. Responsible for troubleshooting and resolving system errors, managing service contract change requests (CRs), and offering comprehensive support across key functional modules including Purchase, Sales, and Finance. Skilled in communicating technical information effectively to clients, ensuring smooth operations and client satisfaction.

Zinka (Nav to Bc upgrade)

Led upgrade projects from Dynamics NAV 2016 CU41 to Business Central SaaS (latest version)

Performed NAV 2016 cumulative update upgrades to the latest CU as a mandatory step before migration

Analyzed legacy C/AL customizations and refactored them into AL-based extensions

Converted classic objects (Tables, Pages, Reports, Codeunits) to AL extensions

Resolved upgrade conflicts, deprecated code issues, and breaking changes.

Deployed extensions and managed environments in Business Central SaaS

Collaborated with functional consultants and business users during UAT and Go-Live

Premier Tissues India Limited (Nav to Bc upgrade)

Project Type: Dynamics NAV to Business Central SaaS Technical Upgrade

Converted legacy C/AL custom objects into AL-based extensions.

Upgraded customized tables, pages, reports, and codeunits.

Implemented opening balances for Finance, Customers, Vendors, and Inventory.

Developed ClearTax E-Invoice Integration using REST API.

Implemented E-Way Bill automation for shipment transactions.

Customized Finance, Sales, Purchase, and Inventory modules.

Developed statutory RDLC reports and supported UAT/go-live.

Power Center Private limited

Project Type: Cloud Migration & Data Upgrade

Executed full database migration from Business Central 2019 On-Premise to latest SaaS version.

Performed schema sync, upgrade codeunit execution, and data validation.

Converted OnPrem customizations into SaaS-compatible AL extensions.

Rebuilt external integrations using REST APIs.

Conducted opening balance validation, reconciliation, and go-live support.

ACHIEVEMENTS & AWARDS

MB-820: Microsoft Dynamics 365 Business Central Developer Associate
