

Apurva Rajendra Jadhav

Business Central Technical Consultant

LinkedIn: <https://www.linkedin.com/in/apurva-jadhav-0720051ba> | Email: jadhavapurva201@gmail.com

PROFESSIONAL SUMMARY

Business Central Technical Consultant with 3 years of hands-on experience in AL development, third-party integrations, and custom solutions. Skilled in Microsoft Graph APIs, payment gateway integrations, warehouse automation, and building complex reports. Currently developing a Business Central app for Microsoft AppSource deployment.

TECHNICAL SKILLS

Core Platform:

Business Central, AL Language, VS Code, GitHub

Integrations:

Microsoft Graph API, REST APIs, OAuth 2.0

Payments:

PayPal, Braintree, Shopify, Amazon, Klarna, eBay

Other:

Job Scheduler, Approval Workflow Engine, Power BI Reports, Performance Profiler, Event Recorder, Page Scripting Tool

WORK EXPERIENCE

Business Central Technical Consultant | Aress Software

2022 – Present | Nashik

Key Projects:

GVAV

- Integrated Microsoft Graph APIs to create Outlook calendar appointments for multiple resources, including email notifications with custom text, notes, and document attachments from the fact box.
- Built custom email alert engine covering Sales, Purchase, and Warehouse modules — alerts include project days over budget, sales orders without back-to-back purchase, call-off orders, uninvoiced receipts, and purchase stock alerts.
- Developed complex reports: Stock Write-Down by Customer/Location/Project, Stock Adjustment, Vendor Term Changes, PO Direct Shipment Receipted.
- Implemented dimension set changes on warehouse transfers.
- Built purchase line consolidation logic — merges identical item/vendor lines from sales, handles purchase-sales reservation, and automates invoice posting after consolidation.
- Designed an advanced invoicing workflow enabling virtual receipt of quantities before physical warehouse receipt; built Project Status, Engineer Booking, and Advanced Invoice reports.

Marketplace

- Developed Amazon order, invoice, credit, and shipping update downloads.
- Built Amazon Stock Level Feed and Product Feed using Graph APIs.
- Integrated Braintree payment downloads and ManoMano order accept, download, and shipping update flows.
- Created general journal batch posting, dimension update (Appeagel), and centralized logging and error handling framework.

Medisave

- Built batch-wise payment downloads from Shopify, Amazon, PayPal, Klarna, and eBay with data storage and reporting.
- Automated warehouse shipment batch posting and Shopify data capture into Business Central.

- Integrated CreditSafe for custom batch rule configuration and customer selection.
- Used Graph APIs to fetch Shopify shipment data batch-wise, store in BC, and auto-post via Job Scheduler.

JES

- Integrated PayPal invoicing with automated payment status tracking, payment alerts, expiry alerts, and payment downloads.
- Implemented Checkout.com payment download integration.

EDUCATION

Bachelor of Engineering – Computer Engineering

2019 – 2022

KBT College of Engineering, Nashik

CURRENTLY WORKING ON

Building and deploying a Business Central App on Microsoft AppSource (Marketplace) with DocuSign integration. Continuing development on the GVAV project with advanced integration and reporting features.
