

Nikesh R

D365 CRM Technical Consultant

Objective

To work in a challenging and professional environment where I can leverage my technical skills and knowledge to deliver high-quality solutions, while contributing to organizational success and enhancing my professional growth

Work Experience

- Worked with **HCL Technologies** as Software Engineer from Sep 2021 to Sep 2024
- Currently with **Capgemini** as Associate Consultant from Sep 2024 to till date

Professional Summary

- Professional Experience of 5+ Years in MSCRM and Power Platform development.
- Expertise on Model driven, Canvas App, Power Automate, AI Builder, Power BI and Power Virtual Agent
- Expertise in OOB configuration and customization, Plugins, Custom Workflows and Web Api's
- Proficient in configuring and managing security roles, business units, and access controls to ensure data integrity and compliance.
- Skilled in extending Dynamics 365 capabilities through JavaScript, plugin development, and Power Platform components.
- Hands-on experience in PCF control development for model-driven apps
- Adept at translating business requirements into technical solutions, optimizing user experience, and delivering high-quality CRM implementations.
- Hands on experience on COE Starter KIT (Admin, Governs, Nurture).
- Hands on experience on SharePoint Online Security, Site Content Type and Column Groups, List and Views.
- Hands on experience on SharePoint Site migration using PnP template using PowerShell Script
- Excellent skills in requirements management, analysis and providing solutions to client's project requirements.
- Experience in developing workflows, business rules, dashboards, charts, power automate, Email templates, Business process flow
- Good knowledge of Web Development skills - HTML, XML, CSS, Bootstrap, Ajax, JavaScript and jQuery.
- Hand on experience working with Azure API
- Deployed the apps and flow from DEV to QA, UAT, PROD Environments

Core Competencies

- Solution Architecture: Dynamics 365 & Power Platform design, scalability, performance optimization, upgrade strategy, governance, and environment management
- Modules & Apps: Dynamics 365 Sales, Customer Service, Field Service; Case Management, SLAs, Entitlements, Lead-to-Cash processes; Model-driven & Canvas Apps
- AI & Automation: Microsoft Copilot (GenAI), Copilot Studio (custom copilots), AI Builder, Power Automate (cloud flows), process automation
- Integrations: Dataverse, REST APIs, Azure Logic Apps, SSIS, custom connectors, data integration (D365-to-D365/3rd party)
- Data & Reporting: Dataverse data modeling, data migration, Power Query, dataflows, Power BI dashboards & reports, real-time analytics, KPI tracking
- Delivery Leadership: requirements gathering workshops, solution design & architecture, stakeholder management, Agile/Scrum ceremonies, technical governance, UAT & release management

Certifications

- PL900 (Microsoft Power Platform Fundamentals)
- MB910 (Microsoft Dynamic 365 Fundamentals (CRM))
- PL400 (Microsoft Power Platform Developer)
- PL200(Microsoft Power Platform Functional Consultant)

Projects

Senior D365 CRM Technical Consultant

📅 10/2021 - Present

Delivered solution architecture and technical leadership across multiple domains:

- Banking (Dynamics 365 Sales, Power Platform, Integrations): Implemented and automated environment provisioning and governance solutions using Power Platform (CoE Starter Kit, Admin connectors); built Canvas Apps and Power Automate Flows for approval management, user lifecycle (joiners/movers/leavers), and data visibility. Developed custom connectors and Azure AD (Graph API) integrations for user/manager mapping, enhancing operational control and process automation.
- Healthcare (Dynamics 365, Power Pages, Copilot-ready architecture): Designed and delivered responsive Power Pages portals integrated with Dataverse, translating Figma-based UI into scalable web solutions using JavaScript and Bootstrap. Enabled data-driven workflows and secure access models, supporting patient/service management scenarios with extensible architecture for AI/Copilot adoption.
- Manufacturing (Dynamics 365 Sales On-Prem → Online Migration, Integrations): End-to-end migration from Dynamics CRM On-Premises to D365 Online, including data migration, environment setup, and solution deployment. Refactored legacy implementations into modern OOB configurations, plugins (C#), and cloud integrations, improving scalability, performance, and maintainability.
- Insurance (Power Platform Governance, CoE, Automation): Implemented Center of Excellence (CoE) Starter Kit for governance, monitoring, and administration. Customized Canvas Apps, cloud flows, and audit mechanisms to track usage, enforce policies, and improve platform adoption across business units.
- Mining (AI Builder, Intelligent Automation): Built AI-driven invoice processing solution using AI Builder with trained models for structured data extraction. Developed Power Automate workflows for invoice parsing, validation, and Excel data integration, reducing manual effort and improving accuracy.
- Brewery / Manufacturing Ops (Canvas Apps, Power BI, Oracle Integration): Developed Canvas Apps integrated with Oracle DB, implementing advanced form validations (Regex), Patch operations, and reusable components. Delivered Power BI dashboards for real-time analytics, improving business visibility and reporting.
- Enterprise / Managed Services (Power Platform, Automation, ITSM-like App): Built enterprise-scale Canvas Apps and Power Automate solutions (e.g., HCL Track ITSM app) for tracking project revenue, change requests, and margins. Implemented role-based security, responsive UI, and complex workflows including timesheet notifications and automated approvals.
- Construction (Model-Driven D365 CE, Customization & Plugins): Designed and implemented model-driven apps using Dataverse, including entity relationships, forms, views, and security roles. Customized system using Ribbon Workbench, JavaScript, and Web API (OData/AJAX). Managed solution lifecycle (managed/unmanaged) and automated processes using cloud flows and templates (email/document generation)

Delivery Leadership and Outcomes

- End-to-end solution delivery across DEV / TEST / UAT / PROD environments, including environment provisioning, solution deployments (managed/unmanaged), release planning, and production rollouts. Managed data migration (on-prem to online), environment strategy, and governance using Power Platform Admin Center and CoE practices.
- Coordinated User Acceptance Testing (UAT) cycles with business stakeholders, ensuring alignment with D365 Sales processes) and successful go-live readiness.
- Resolved complex production issues across Dynamics 365 and Power Platform solutions, including plugins, workflows, Power Automate flows, and integrations (custom connectors/APIs); performed detailed root cause analysis (RCA) and implemented preventive optimizations for performance, scalability, and reliability.

Education

- 2020- Completed B.Tech in ECE with 67.5%, Ponnaiya Ramajayam Institute of Science and Technology, Chennai.
- 2015- Completed HSC with 74%, Fusco's matriculation higher secondary school, Madurai
- 2013- Completed SSLC with 81.5%, Fusco's matriculation higher secondary school, Madurai
